**Past performance does not ensure future results, and there is no assurance that the Fund will achieve its investment objectives.** An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted above. More current performance data through the most recent month-end, as well as special reports and analysis, are available at the Fund's website [www.hussmanfunds.com](http://www.hussmanfunds.com). The Fund has the ability to vary its exposure to market fluctuations depending on overall market conditions, and may not track movements in the overall stock market, particularly over the short-term. The Fund has the ability to hedge market risk by selling short major market indices in an amount up to, but not exceeding, the value of its stock holdings. The Fund also has the ability to leverage the amount of stock it controls to as much as 1 1/2 times the value of net assets, by investing a limited percentage of assets in call options. While the intent of this strategy is long-term capital appreciation and protection of capital, the investment return and principal value of the Fund may fluctuate or deviate from overall market returns to a greater degree than other funds that do not employ these strategies. For example, if the Fund has taken a defensive posture and the market advances, the return to investors will be lower than if the Fund had not been defensive. Alternatively, if the Fund has taken an aggressive posture, a market decline will magnify the Fund's investment losses. Investors should consider the investment objectives, risks, and charges and expenses of the Fund carefully before investing. For this and other information, please obtain a Prospectus and read it carefully before investing. A copy of the Prospectus may be obtained at [www.hussman.net](http://www.hussman.net) or by calling 1-800-487-7626.
