The Fund seeks to achieve long-term capital appreciation, with added emphasis on the protection of capital during unfavorable market conditions. It pursues this objective by investing principally in equity securities of non-U.S. issuers, and uses hedging strategies to vary the exposure of the Fund to general market fluctuations.

WHAT IS THE FUND’S INVESTMENT OBJECTIVE?

HUSSMAN STRATEGIC INTERNATIONAL FUND (the “Fund”) seeks to achieve long-term capital appreciation, with added emphasis on the protection of capital during unfavorable market conditions.

WHAT ARE THE FUND’S FEES AND EXPENSES?

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

<table>
<thead>
<tr>
<th>Shareholder Fees (fees paid directly from your investment)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum Sales Charge (Load) Imposed on Purchases</td>
</tr>
<tr>
<td>Maximum Deferred Sales Charge (Load)</td>
</tr>
<tr>
<td>Maximum Sales Charge (Load) Imposed on Reinvested Dividends</td>
</tr>
<tr>
<td>Redemption Fee (as a percentage of amount redeemed, if applicable)</td>
</tr>
<tr>
<td>Exchange Fee (as a percentage of amount exchanged, if applicable)</td>
</tr>
<tr>
<td>Wire Transfer Fee</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management Fees</td>
</tr>
<tr>
<td>Distribution (12b-1) Fees</td>
</tr>
<tr>
<td>Other Expenses</td>
</tr>
<tr>
<td>Acquired Fund Fees and Expenses</td>
</tr>
<tr>
<td>Total Annual Fund Operating Expenses</td>
</tr>
</tbody>
</table>

(1) Total Annual Fund Operating Expenses will not correlate to the Fund’s ratio of expenses to average net assets in the Fund’s Financial Highlights, which reflects the operating expenses of the Fund but does not include Acquired Fund Fees and Expenses.
Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost</td>
<td>$156</td>
<td>$483</td>
<td>$834</td>
<td>$1,824</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may result in higher transaction costs and may also result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 59% of the average value of its portfolio.

WHAT ARE THE FUND’S PRINCIPAL INVESTMENT STRATEGIES?

Under normal market conditions, the Fund invests principally in: (i) equity securities of companies that derive a majority of their revenues or profits from, or have a majority of their assets in, a country or countries other than the U.S.; and (ii) shares of exchange traded funds (“ETFs”) and similar investment vehicles that invest principally in the equity securities of such companies. The Fund may invest in all types of equity securities, including common stock, preferred and convertible preferred stocks, warrants and rights. When market conditions are unfavorable in the view of Hussman Strategic Advisors, Inc., the Fund’s investment manager, the Fund may use swaps, index options and index futures to reduce its exposures to general market fluctuations or to market fluctuations within a specific country or geographic region.

The Fund invests principally in equity securities issued by companies in developed countries, but may also invest in emerging markets in developing countries. There are no restrictions as to the market capitalization of companies in which the Fund invests. The Fund may invest in American Depositary Receipts (ADRs) listed on U.S. stock exchanges and depositary receipts listed on foreign stock exchanges. These securities
represent ownership interests in the securities of non-U.S. issuers. The Fund may invest up to 30% of its net assets in shares of ETFs and similar investment vehicles that invest in foreign equity securities.

In general, the stock selection approach of the investment manager focuses on securities demonstrating favorable valuations and/or market action. The primary consideration used in assessing a stock’s valuation is the relationship between its current market price and the present value of expected future cash flows per share. Other valuation measures, such as the ratio of the stock price to earnings and stock price to revenue, are also analyzed in relation to expected future growth of cash flows in an attempt to measure underlying value and the potential for long-term returns. The analysis of market action includes measurements of price behavior and trading volume. The investment manager believes that strength in these measures is often a reflection of improving business prospects and the potential for earnings surprises above consensus estimates, which can result in increases in stock prices.

The investment manager believes that market return/risk conditions differ significantly across varying market conditions. The two most important dimensions considered by the investment manager are “valuation” and “market action.” In the analysis of overall market conditions, valuation considers the relationship of major stock indices to the stream of earnings, dividends and cash flows expected in the future in an attempt to measure the underlying value of stocks and the long-term returns implied by their current market prices. Market action considers the behavior of a wide range of securities and industry groups, in an attempt to assess the economic outlook of investors and their willingness to accept market risk. In addition, the investment manager evaluates economic conditions, investor sentiment, interest rates, credit-sensitive indicators and other factors in an attempt to classify prevailing market conditions with historically similar instances.

Historically, different combinations of valuation, market action and other factors have been accompanied by significantly different stock market performance in terms of return/risk. The investment manager expects to hold a fully invested position in equity securities in environments where the expected return from market risk is believed to be high, and may reduce or “hedge” the exposure of the Fund to market fluctuations in environments where the expected return from market risk is believed to be unfavorable.

Specific strategies for reducing or “hedging” market exposure may include entering into swaps, or establishing short futures positions or option combinations (such as simultaneously writing call options and purchasing put options) on one or more stock indices considered by the investment manager to be correlated with the Fund’s portfolio. The total notional value of the Fund’s hedge positions is not expected...
to exceed the value of stocks owned by the Fund, so that the most defensive position expected by the Fund will be a “fully hedged” position in which the notional values of long and short exposures are of equal size.

The choice of stock indices and instruments used for hedging is based on a consideration of the securities held in the Fund’s portfolio from time to time, and the availability and liquidity of futures, options and other instruments (such as ETFs) on such indices. The primary intent of the Fund’s hedging strategy is to reduce the impact of general market fluctuations when global stock market conditions generally or within a specific country, geographic region or industry sector are viewed by the investment manager as unfavorable. The Fund generally hedges using indices that are correlated, though perhaps imperfectly, with the stocks owned by the Fund. These may include foreign stock indices and indices of U.S. stocks such as the Standard and Poor’s 500 Index. The instruments used to hedge foreign stock markets may hedge equity risk with or without hedging currency risk. The Fund has the discretion to enter into foreign currency contracts or currency index futures to hedge against the adverse impact of changes in foreign exchange rates on its investments and transactions in foreign securities. Positions that separately hedge market risk and currency risk are netted as single positions for the purposes of calculating the notional value of the Fund’s hedges. In order to enhance the ability of the Fund to implement hedging strategies during market conditions that are viewed as unfavorable by the investment manager, the Fund may maintain a significant portion of its assets in cash and money market securities as may be needed in connection with its hedging strategies.

The portion of the Fund’s net assets invested at any given time in securities of issuers engaged in industries within a particular business sector or countries within a specific geographic region is affected by valuation considerations and other investment characteristics of that sector or region. As a result, the Fund’s investments in various business sectors or geographic regions generally will change over time, and a significant allocation to any particular sector or region does not represent an investment policy or investment strategy to invest in that sector or region.

Because the MSCI Europe, Australasia, and Far East Index (“MSCI EAFE Index”) is perhaps the most widely recognized index of common stocks in foreign markets, it is believed to be an appropriate broad-based securities market index against which to compare the Fund’s long-term performance. The Fund may invest in securities that are not included in the MSCI EAFE Index, and may vary its exposure to market fluctuations depending on market conditions. As a result, the Fund’s investment returns may differ from the performance of major foreign stock market indices, particularly over the short term, and from the performance of U.S. stock markets.
WHAT ARE THE PRINCIPAL RISKS OF INVESTING IN THE FUND?

Shares of the Fund may fall in value and there is a risk that you could lose money by investing in the Fund. There can be no assurance that the Fund will achieve its investment objective. Due to the investment techniques employed by the Fund and the types of securities in which it invests, the Fund is designed for investors who are investing for the long term.

The principal risks of the Fund are the risks generally associated with investing in stocks. Stock market movements will affect the Fund’s share price on a daily basis. Significant declines are possible both in the overall stock market and in the prices of specific securities held by the Fund. The market values of stocks can fluctuate significantly, reflecting such things as the business performance of the issuing company, investors’ perceptions of the company or the overall stock market and general economic conditions. Global economics and financial markets are becoming increasingly interconnected and political events within the U.S. and abroad have disrupted and may continue to disrupt the securities markets. The economic conditions and instability in the financial markets in recent years has led the U.S. Government and foreign governments to take a number of unprecedented actions and pursue various policies designed to support the financial markets and certain financial institutions. There is the risk that policy changes by foreign governments (such as increasing interest rates) or by the U.S. Government (such as the tapering of quantitative easing measures by the Federal Reserve) could result in increased volatility and less liquidity in the financial markets. Uncertainty surrounding the sovereign debt of a number of European countries and the viability of the European Union could significantly impact the value of the Fund’s investments.

Because the Fund invests principally in the securities of foreign companies and U.S. companies that conduct significant activities or have significant assets outside the U.S. (including shares of ETFs and similar investment vehicles that invest principally in the securities of such companies), an investment in the Fund involves greater risks than an investment in a mutual fund that invests principally in the securities of U.S. companies. Risks can result from varying stages of economic and political development, differing regulatory environments, trading days and accounting standards, uncertain tax laws, and higher transaction costs in foreign markets. Investments outside the U.S. may be adversely affected by governmental actions such as capital or currency controls, nationalization of a company or industry, expropriation of assets, or imposition of high taxes. Also, foreign markets can be more volatile than U.S. markets. European Union member countries that use the Euro as their currency (so-called Eurozone countries) lack the ability to implement an independent monetary policy and may be significantly affected by requirements that limit their fiscal options. Following the recent global economic crisis, some of these countries have depended on, and may continue to be dependent on, the assistance from others such as the European Central Bank and other governments or institutions, and failure to implement...
Reforms as a condition of assistance may have negative long-term effects for the economies of those countries and other European countries. Trading in foreign securities may take place in various foreign markets on certain days when the Fund is not open for business and does not calculate its share price. As a result, the value of the Fund’s investment portfolio, and thus its share price, may be significantly affected on days when shareholders cannot buy or redeem shares of the Fund.

The success of the Fund’s investment strategy depends largely on the investment manager’s skill in assessing the potential for appreciation in value of the securities in which the Fund invests. The investment program of the Fund includes the use of certain hedging strategies and techniques that are not employed by traditional mutual funds and there is no assurance that these strategies will be successful. The hedging strategies used to vary the Fund’s exposure to general market fluctuations over the course of the market cycle may adversely impact the investment performance of the Fund, particularly during times when the stock market is generally rising. Also, because the Fund’s exposure to market fluctuations will vary depending on the investment manager’s assessment of current stock market conditions in various foreign countries and geographic regions, the investment return and share price of the Fund may fluctuate or deviate from overall market returns generally or within individual countries or geographic regions to a greater degree than other funds that do not employ this strategy. This is known as “tracking risk.” For example, if the Fund has taken a defensive investment posture by hedging all or a portion of the exposure of its portfolio against the risk of price declines, and stock prices advance, the return to investors in the Fund will be lower than if the portfolio had not been hedged.

At times when the Fund emphasizes investment in one or more particular business sectors, the value of its net assets will be more susceptible to the financial, market or economic events affecting issuers and industries within those sectors than would be the case for mutual funds that do not emphasize investment in particular sectors. This may increase the risk of loss associated with an investment in the Fund and increase the volatility of the Fund’s net asset value per share.

The Fund may invest a portion of its assets in the stocks of companies having smaller market capitalizations, including mid-cap and small-cap stocks. The stocks of these companies often have less liquidity than the stocks of larger companies and these companies frequently have less management depth, narrower market penetrations, less diverse product lines, and fewer resources than larger companies. Due to these and other factors, stocks of smaller companies may be more susceptible to market downturns and other events, and their prices may be more volatile than stock prices of larger companies.

The techniques used by the investment manager to hedge the Fund’s portfolio are primarily intended to reduce the impact of general market fluctuations on the Fund’s portfolio, but such techniques involve certain risks and may adversely impact the investment
performance of the Fund. For example, a hedge might not actually correlate well to the price movements of the Fund’s stock investments and may have an unexpected or undesired result, such as a loss or a reduction in gains. The Fund may experience a loss even when it is “fully hedged,” if the returns of the stocks held by the Fund fall short of the returns of the securities and financial instruments used to hedge, or if the exercise prices of the Fund’s call and put option hedges differ, so that the combined loss on these options during a market advance exceeds the gain on the underlying stock index. The Fund’s hedging positions are intended to provide a hedge against general movements in the foreign stock markets as they might impact the overall portfolio. However, the Fund does not invest solely in the securities included in any index or invest in geographical areas or industry sectors in the same proportion as such areas or sectors may be represented in any index. For this reason, the hedging strategy used by the Fund does not eliminate market risk or provide complete protection against adverse changes in the prices of individual securities or securities within particular geographical areas or industry sectors. When options are owned by the Fund, it is possible that they may lose value over time, even if the prices of the securities underlying such options are unchanged.

**WHAT HAS BEEN THE FUND’S PERFORMANCE HISTORY?**

The bar chart and performance table shown below provide some indication of the risks and variability of investing in the Fund. The bar chart shows changes in the Fund’s performance from year to year for each full calendar year over the lifetime of the Fund. The performance table shows how the Fund’s average annual total returns for 1 year and since inception compare with those of a broad measure of market performance. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information, current through the most recent month end, is available on the Fund’s website at www.hussmanfunds.com or by calling 1-800-HUSSMAN (1-800-487-7626).

![Performance Chart]

The Fund’s year-to-date return through September 30, 2014 is –4.01%.
During the periods shown in the bar chart, the highest return for a quarter was 3.87% during the quarter ended September 30, 2010 and the lowest return for a quarter was –3.84% during the quarter ended December 31, 2011.

**Average Annual Total Returns for Periods Ended December 31, 2013**

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown and are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”).

**MANAGEMENT OF THE FUND**

**Investment Manager**

Hussman Strategic Advisors, Inc.

**Portfolio Managers**

John P. Hussman, Ph.D., the Fund’s lead portfolio manager, is the Chairman and President of Hussman Strategic Advisors, Inc. William J. Hester, CFA, the co-portfolio manager of the Fund, is a Senior Research Analyst of Hussman Strategic Advisors, Inc. They have been the Fund’s portfolio managers since its inception in December 2009.
PURCHASE AND SALE OF FUND SHARES

Minimum Initial Investment – $1,000, except the minimum is $500 for an IRA or a gift to minors account.

Minimum Subsequent Investment – $100, except the minimum is $50 for an IRA or a gift to minors account.

You may purchase or redeem (sell) shares of the Fund on each day that the New York Stock Exchange is open for business. Transactions may be initiated by written request (The Hussman Funds, c/o Ultimus Fund Solutions, LLC, P.O. Box 46707, Cincinnati, Ohio 45246-0707), by telephone or through your financial institution.

TAX INFORMATION

The Fund’s distributions are generally taxed as ordinary income or capital gains unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an IRA, or you are a tax-exempt investor. If you are investing through a tax-deferred arrangement, you may be taxed later upon withdrawal of monies from such arrangement.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund may pay the intermediary for various services it provides to the Fund or to customers of the intermediary who invest in the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
INVESTMENT OBJECTIVE

The Fund seeks to achieve long-term capital appreciation, with added emphasis on the protection of capital during unfavorable market conditions. It pursues this objective by investing principally in equity securities of non-U.S. issuers, and uses hedging strategies to vary the exposure of the Fund to general market fluctuations. The Fund is designed for investors who want to participate in foreign stock markets, and also want to reduce their exposure to general market fluctuations in conditions that have historically been unfavorable for foreign stocks.

PORTFOLIO MANAGEMENT PROCESS

Security Selection

The Fund invests principally in the equity securities of non-U.S. issuers in major developed foreign countries, although the Fund may invest a portion of assets in securities of issuers in developing or emerging market countries. The investment manager’s investment process emphasizes “bottom-up” security selection, focusing on an analysis of a company’s “fundamentals” – revenues, earnings, cash-flows, dividends, and assets and liabilities – coupled with an analysis of market action, including price behavior and trading volume. Although the investment manager limits the portion of the Fund’s portfolio allocated to investments in any specific country or industry group to reduce investment risks, the investment manager’s stock selection process intentionally results in overall portfolio allocation weights to countries and industry groups that differ from what a passive capitalization-based strategy would produce.

The investment manager’s stock selection approach generally seeks to identify for investment by the Fund securities which display one or more of the following: (1) favorable valuation, meaning a price which appears reasonable relative to revenues, earnings, cash-flows and dividends expected in the future; and (2) favorable market action as measured by factors such as price behavior and trading volume.

The investment manager believes that the information contained in earnings, balance sheets and annual reports represents only a fraction of what is known about a given stock. The price behavior and trading volume of a stock may reveal additional information about what traders know. For example, positive earnings surprises are generally followed by price strength. More importantly, such surprises are often preceded by price strength. In addition to using fundamental research on earnings and valuation, the investment manager relies on statistical methods to infer as much information as possible from the behavior of individual stock prices.
The focus of this investment approach is to buy securities of quality companies exhibiting attractive valuation and market action (price and volume behavior) which convey favorable information about their future prospects.

**Evaluation of Market Conditions**

Some risks are more rewarding than others. Rather than fully exposing the Fund to stock market risk at all times, the investment manager attempts to reduce the risk of major capital loss during conditions that have historically been unfavorable for foreign equity securities. In market conditions which the investment manager identifies as involving high risk and low expected return per unit of risk, the Fund’s portfolio may be hedged. The Fund will be fully invested only when the investment manager identifies conditions in which stocks have historically been rewarding investments.

The following discussion is intended to explain the general framework used by the investment manager to assess whether market conditions are favorable or unfavorable. It should not be interpreted as an exhaustive account of the market analysis techniques used by the investment manager. The investment manager’s estimates of prospective market return and risk are based on historical data. There is no assurance that these historical return/risk profiles will continue to be true in the future.

The investment manager uses an ensemble of evidence to classify investment conditions, with “valuation” and “market action” being the most important considerations. Valuation considers the stream of earnings, dividends and cash flows expected in the future in an attempt to measure the underlying value of stocks and the long-term returns implied by their actual prices. Market action considers the behavior of a wide range of securities and industry groups in an attempt to assess the economic outlook of investors and their willingness to accept market risk. In addition, the investment manager assesses market action by evaluating economic conditions, investor sentiment, interest rates, credit-sensitive indicators and other factors in an attempt to classify prevailing market conditions with historically similar instances. Thus, market action gauges aspects of market behavior well beyond obvious trends of major stock market indices and also considers extremes in the duration and extent of prevailing trends. For this reason, market action may be graded as positive even when major stock indices have recently declined, and conversely, may be graded as negative even when major stock indices have recently advanced.

The intent of the investment manager’s approach is not to “predict” market direction. All of the investment conditions identified by the investment manager may experience short-term returns which are both positive and negative. Rather, the intent of the approach is to classify prevailing investment conditions with those historical
instances having the greatest similarity, and to accept those investment risks which are expected to be compensated by high returns, on average, while attempting to systematically avoid those risks which have historically not been compensated.

The investment manager believes that the strongest market returns generally occur when both valuations and market action are favorable. On a historical basis, much of the lowest risk, highest market returns have been associated with these conditions. Accordingly, this is a climate in which the Fund may establish an aggressive investment position in a country or geographic region, without employing hedging strategies. Although historical stock market returns in such conditions generally have been above the norm, it is possible during any particular period that returns in this climate may nonetheless be negative.

In contrast, the investment manager believes that the most severe market losses generally occur when both valuations and market action are unfavorable. When both valuations and market action have been unfavorable, equity securities have historically generated poor returns, on average. Even so, it is possible that returns in this climate may be positive during any particular period. The use of hedging during such a period could lead to a loss or a smaller gain than if the Fund had not hedged.

Although the classification of market conditions depends on a wide range of observable conditions, hedging is expected to be used to a lesser extent during intermediate conditions where either valuation or market action is favorable and the other is unfavorable.

INVESTMENT PRACTICES AND RISKS

A brief description of the Fund’s investments and the investment practices that the Fund may employ, together with a discussion of risks associated with investing in the Fund, is provided below. (The Statement of Additional Information (“SAI”) contains further details about particular types of investments, investment strategies and hedging techniques that may be utilized by the Fund, as well as their risks.) Because of the types of securities in which the Fund invests and the investment techniques the Fund uses, the Fund is designed for investors who are investing for the long term. The investment manager tries to reduce risks by diversifying investments, by carefully researching securities before they are purchased, and by using hedging techniques when considered appropriate. However, adverse changes in overall market prices and the prices of investments held by the Fund can occur at any time and there is no assurance that the models used by the investment manager in determining which securities to purchase and whether to hedge all or a portion of the market exposure of the Fund’s portfolio will be accurate or appropriate, and there is no assurance that the Fund will achieve its investment objective. The hedging strategies used to vary the
Fund’s exposure to general market fluctuations over the course of the market cycle may adversely impact the investment performance of the Fund, particularly during times when the stock market is generally rising. When you redeem your Fund shares, they may be worth more or less than what you paid for them.

- **Stock Investment Risks.** Because the Fund normally invests principally in common stocks and other equity securities, the value of the Fund’s portfolio will be affected by changes in the stock markets. At times, the foreign stock markets can be volatile, and stock prices can change drastically.

  This market risk will affect the Fund’s share price, which will fluctuate as the values of the Fund’s portfolio securities and other assets change. Not all stock prices change uniformly or at the same time, and not all stock markets move in the same direction at the same time. In addition, other factors can adversely affect a particular stock’s prices (for example, poor management decisions, poor earnings reports by an issuer, loss of major customers, competition, major litigation against an issuer, or changes in government regulations affecting an industry). Not all of these factors can be predicted.

- **Foreign Investment Risks.** Because the Fund invests principally in the securities of foreign companies and U.S. companies that conduct significant activities or have significant assets outside the U.S. (including shares of ETFs and similar investment vehicles that invest principally in the securities of such companies), an investment in the Fund involves greater risks than an investment in a mutual fund that invests principally in the securities of U.S. companies. Risks can result from varying stages of economic and political development, differing regulatory environments, trading days and accounting standards, uncertain tax laws, and higher transaction costs in foreign markets. Investments outside the U.S. may be adversely affected by governmental actions such as capital or currency controls, nationalization of a company or industry, expropriation of assets, or imposition of high taxes. Also, foreign markets can be more volatile than U.S. markets. European Union member countries that use the Euro as their currency (so-called Eurozone countries) lack the ability to implement an independent monetary policy and may be significantly affected by requirements that limit their fiscal options. Following the recent global economic crisis, some of these countries have depended on, and may continue to be dependent on, the assistance from others such as the European Central Bank and other governments or institutions, and failure to implement reforms as a condition of assistance may have negative long-term effects for the economies of those countries and other European countries. Trading in foreign securities may take place in various foreign markets on certain days when the Fund is not open.
for business and does not calculate its share price. As a result, the value of the Fund’s investment portfolio, and its share price, may be significantly affected on days when shareholders cannot buy or redeem shares of the Fund.

• **Currency Risk.** Because the Fund holds securities valued in foreign currencies and holds foreign currencies when it purchases and sells foreign securities, changes in exchange rates will impact the value of the Fund’s assets. Thus, investments in foreign securities involve currency risk, which is the risk that the values of the foreign securities and other assets denominated in foreign currencies will decrease due to adverse changes in the value of the U.S. dollar relative to the value of foreign currencies. The Fund may, but is not required to, hedge against currency risk through the use of forward foreign currency contracts which are entered into directly with dealers. A forward foreign currency contract is an obligation to purchase or sell a specified currency at a future date which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price established at the time of the contract. These contracts involve the risk of loss due to the imposition of exchange controls by a foreign government, the delivery failure or default by the other party to the transaction, or the inability of the Fund to close out a position if the trading market becomes illiquid. There can be no assurance that any currency hedging transactions will be successful, and the Fund may suffer losses from these transactions.

• **Emerging Markets Risk.** Although the Fund invests principally in equity securities issued by companies in developed countries, it may also invest in emerging markets in developing countries. Investments in emerging markets, which include Africa, parts of Europe and much of Asia, the Middle East and Central and South America, are subject to the risk of abrupt and severe price declines. The economic and political structures of developing countries, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and financial markets in developing countries are not as liquid as markets in developed countries. The economies in developing countries are less mature and can be overly reliant on particular industries and more vulnerable to the ebb and flow of international trade, trade barriers, and other protectionist measures. Certain countries may have legacies or periodic episodes of hyperinflation and currency devaluations, or of instability and upheaval, that could cause their governments to act in a detrimental or hostile manner toward private enterprise or foreign investment. Significant risks of war and terrorism currently affect some developing countries.
• **Market Capitalization Risk.** The Fund may invest a portion of its assets in the stocks of companies having smaller market capitalizations, including mid-cap and small-cap stocks. The stocks of these companies often have less liquidity than the stocks of larger companies and these companies frequently have less management depth, narrower market penetrations, less diverse product lines, and fewer resources than larger companies. Due to these and other factors, stocks of smaller companies may be more susceptible to market downturns and other events, and their prices may be more volatile than the stocks of larger companies.

• **Sector Risk.** If the Fund emphasizes one or more business sectors or geographic regions in its portfolio, it may be more susceptible to the financial, market or economic events generally affecting issuers and industries within those sectors or regions than funds that do not emphasize particular business sectors or geographic regions. The less the Fund diversifies across business sectors or geographic regions, the greater the potential for loss and volatility than for a fund invested in a wider spectrum of sectors or regions.

• **Exchange Traded Funds.** The Fund may invest up to 30% of its net assets in shares of ETFs and similar investment vehicles. ETFs and these similar vehicles differ from traditional index funds in that their shares are listed on a securities exchange and can be traded intraday. ETF shares in which the Fund generally invests are shares of exchange traded investment companies registered under the Investment Company Act of 1940 that typically hold a portfolio of common stocks designed to track the performance of a particular index. Similar investment vehicles in which the Fund invests that are not investment companies due to their legal structure are similar to ETFs and are designed to track the performance of an index or basket of securities.

Investment in shares of ETFs and similar investments involve risks generally associated with investments in common stocks, including the risk that the general level of stock prices, or that the prices of stocks within a particular sector or geographic region, may decline, thereby affecting the value of the shares of the ETFs held by the Fund. ETFs are also subject to the risks that: (1) an active trading market for shares may not develop or be maintained; (2) an ETF’s share price may not track its specified market index and may trade below its net asset value; (3) ETFs in which the Fund invests generally are not actively managed and do not attempt to take defensive positions in volatile or declining markets; (4) trading of shares may be halted if the listing exchange deems such action appropriate; and (5) the shares may be delisted from the exchange on which they trade, or activation of “circuit breakers” (which are tied to large decreases in stock prices) may temporarily halt trading.
The investment manager may decide to purchase or sell short ETF shares (or shares of similar investment vehicles) or options on ETF shares for the same reasons it would purchase or sell (and as an alternative to purchasing or selling) individual stocks, futures contracts, or options on futures contracts—to obtain exposure to the stock market or a particular segment of the stock market, or to hedge the Fund’s portfolio against such exposures. Depending on the holding period and other factors, the use of ETF shares and options thereon (and similar investments) can be less costly than the use of index options or stock index futures. In addition, these investments can typically be purchased in amounts that are smaller than available from futures contracts and may provide the Fund with the ability to create exposure to markets and market sectors for which there are no suitable or liquid futures contracts or options.

- **Short Sales of ETFs.** The Fund effects short sales of ETF shares and similar investment vehicles solely for hedging purposes. However, these transactions nonetheless involve certain risks. A short sale involves the sale of ETF shares that the Fund does not own in anticipation of purchasing those shares in the future at a lower price. If the price of the ETF shares sold short declines (in an amount exceeding transaction costs), the Fund will realize a gain from the transaction. Conversely, if the price of the shares sold short increases, the Fund will realize a loss. The amount of this loss, in theory, is unlimited because there is no limit on the possible increase in market price of the securities sold short. For this reason short selling is considered to be a speculative practice.

- **Derivative Instruments.** The Fund may enter into swap agreements, purchase and sell futures contracts on broad-based stock indices and currencies (and options on such futures contracts), and may purchase and write put and call options on such indices. The Fund may also purchase and write call and put options on shares of ETFs (and similar investment vehicles). These are all referred to as “derivative” instruments, since their values are based on (“derived from”) the values of other securities.

Options and certain other derivatives may be purchased on established exchanges or through privately negotiated over-the-counter (“OTC”) transactions. The Fund effects OTC derivatives transactions only with counterparties that the investment manager believes to be creditworthy. However, these transactions involve risks not associated with exchange traded derivatives because there is no exchange on which to close out an open position, no standardization of contracts, no assurance that a counterparty will remain creditworthy or solvent, and no assurance that a market for an OTC derivative will be made or maintained or will be liquid or remain liquid.
Swaps are individually negotiated agreements that can be structured to adjust the Fund’s exposure to particular markets, countries, geographic regions or business sectors. Swap agreements can take many different forms and are known by a variety of names. In a typical swap of the type most likely to be used by the Fund, the Fund and a counterparty agree to make payments to each other based on changes in the value of a specified stock index in exchange for payments by the Fund of a specified interest rate (typically, a floating rate), applied to a stated or “notional” amount. Because swaps are OTC transactions they are subject to counterparty risk. For example, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. Swap agreements also may be considered to be illiquid. (See “Illiquid Investments” below.) The Fund’s use of swaps generally will be limited to equity swaps through which the Fund seeks to hedge its investment exposure.

A stock index futures contract is an agreement to take or make delivery of an amount of cash based on the difference between the value of a specified index at the beginning and at the end of the contract period. When a futures contract is sold short, the seller earns a positive return if the stock index declines in value, and earns a negative return if the stock index increases in value. The primary use of stock index futures by the Fund will be to hedge the Fund’s stock portfolio against potential market declines. The term “hedging” refers to the practice of attempting to offset a potential loss in one position by establishing an opposite position in another investment.

A call option gives the purchaser of the option the right to purchase the underlying security from the writer of the option at a specified exercise price. A put option gives the purchaser of the option the right to sell the underlying security to the writer of the option at a specified exercise price. The expected use of call options by the Fund will generally be to write call options on stock indices or ETFs (or similar investment vehicles) for the purpose of hedging market risk. The Fund may also purchase put options on stock indices or ETFs for the purpose of hedging market risk.

The Fund adheres to specific limitations on its use of derivatives and other hedging strategies, including short sales of shares of ETFs. The most defensive stance expected to be taken by the Fund will be a “fully hedged” position. Accordingly, even during the most unfavorable market conditions, the notional value of hedging positions through the combination of short futures contracts, short call options and purchased put options, short sales of ETF shares and all other instruments used for hedging is not expected to exceed the aggregate value of the equity securities owned by the Fund.
Derivative instruments can be volatile and the potential loss to the Fund may exceed the Fund’s initial investment. The use of these instruments requires special skills and knowledge of investment techniques that are different than those normally required for purchasing and selling securities. If the investment manager uses a derivative instrument at the wrong time or judges market conditions incorrectly, or if the derivative instrument does not perform as expected, these strategies may significantly reduce the Fund’s return. The Fund could also experience losses if the indices underlying its positions in derivatives are not closely correlated with the securities held by the Fund, or if the Fund is unable to close out a position because the market for an instrument or position is or becomes illiquid. Options purchased by the Fund may decline in value with the passage of time, even in the absence of movement in the price of the underlying security.

Under its investment policies, the Fund is authorized to use other types of derivative instruments, which are described in the SAI, in connection with its investment program. However, the Fund does not intend to use any of these instruments during the coming year.

- **Illiquid Investments.** Although the Fund invests primarily in liquid, publicly traded securities, OTC instruments used by the Fund for hedging purposes (such as OTC swaps and options) may not have an active trading market or may be illiquid. Because of the absence of a trading market for illiquid investments, the Fund may not be able to sell such investments at prices approximating those at which the Fund values them or at the times it desires to do so. This may adversely affect the Fund’s net asset value. Illiquid securities may trade at a discount from comparable liquid investments and may be subject to wide fluctuations in value. The Fund will not invest more than 15% of the value of its net assets in securities and other investments that are illiquid.

- **Temporary and Defensive Investments.** During periods of extremely adverse market or economic conditions, generally reflecting unusually elevated valuations, weak market action, or severe liquidity risks in the judgment of the investment manager, the Fund may temporarily invest all or a substantial portion of its assets in high quality, fixed income securities, money market instruments and shares of money market mutual funds, or it may hold cash. When the Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. If the general market advances during such periods, these defensive investments may reduce the Fund’s return relative to a passive buy-and-hold investment strategy. The Fund may also hold these investments for liquidity purposes, or as collateral against certain hedging positions held by the Fund. A low interest rate environment may prevent money market instruments or shares of money market mutual funds
from keeping pace with inflation, which could result in a net loss of purchasing power for long-term investors. When the Fund invests in shares of money market mutual funds, the Fund will bear its pro rata proportion of the mutual fund’s expenses, in addition to the expenses the Fund bears directly for its own operations.

- **Portfolio Turnover.** The Fund may engage in short-term trading. This means that the Fund may buy a security and sell that security a short period of time after its purchase to realize gains if the investment manager believes that the sale is in the best interest of the Fund (for example, if the investment manager believes an alternative investment has greater growth potential). Short-term trading will increase the Fund’s portfolio turnover rate and generate higher transaction costs due to commissions or dealer mark-ups and other expenses, which would reduce the Fund’s investment performance. In addition, a high level of short-term trading may accelerate taxable income recognized by shareholders, and may reduce the after-tax returns of the shareholders, in particular because it may generate short-term capital gains, which are taxed at ordinary income tax rates.
THE INVESTMENT MANAGER AND PORTFOLIO MANAGERS

Hussman Strategic Advisors, Inc. ("Hussman Strategic Advisors"), 5136 Dorsey Hall Drive, Ellicott City, Maryland 21042, serves as the investment manager of the Fund. Hussman Strategic Advisors is a registered investment adviser that manages more than $1.7 billion in assets as of September 30, 2014.

John P. Hussman, Ph.D. (Economics, Stanford University, 1992) has been the Chairman, President and controlling shareholder of Hussman Strategic Advisors since its inception in August 1999. Dr. Hussman also serves as the President of Hussman Investment Trust (the “Trust”) and has served as the portfolio manager of the Fund since its inception in December 2009. From 1992 until 1999, he was an Adjunct Assistant Professor of Economics and International Finance at the University of Michigan and the Michigan Business School. His academic research has focused on financial market efficiency and information economics.

William J. Hester, CFA is a Senior Research Analyst at Hussman Strategic Advisors and is the co-portfolio manager of the Fund. He joined Hussman Strategic Advisors in 2003, and has over 20 years of experience in financial analysis and investment research.

The portfolio managers collaborate in research, market analysis and security selection for the Fund. Dr. Hussman is responsible for the day-to-day investment decisions and continuously reviews, supervises and administers the Fund’s investment program. The Fund’s SAI contains further details about the portfolio managers’ compensation, other accounts managed by the portfolio managers, and the portfolio managers’ ownership of Fund shares. Although Dr. Hussman is not the sole portfolio manager of the Fund, his knowledge and expertise regarding the investment and hedging strategies used by the Fund may be critical to the Fund’s ability to pursue its investment program. For this reason, in the event that Dr. Hussman becomes unable to manage the Fund’s investment portfolio, the Board of Trustees of the Trust would take such action as it deems to be in the best interest of the Fund’s shareholders, which could include an orderly liquidation of the Fund and return of capital to shareholders.

In consideration of services provided by Hussman Strategic Advisors, the Fund pays Hussman Strategic Advisors an investment advisory fee based upon the amount of the Fund’s average daily net assets. The investment advisory fee is computed at the annual rates of 0.95% of the first $2 billion of average daily net assets of the Fund, 0.90% of the next $3 billion of such assets, and 0.85% of such assets over $5 billion. The investment advisory fee paid by the Fund to Hussman Strategic Advisors during the fiscal year ended June 30, 2014 was equal to 0.95% of the Fund’s average daily net assets.
A discussion regarding the basis for the most recent approval by the Board of Trustees of the annual continuance of the Fund’s investment advisory agreement with Hussman Strategic Advisors is available in the Fund’s annual report for the fiscal year ended June 30, 2014.

THE ADMINISTRATOR

Ultimus Fund Solutions, LLC ("Ultimus"), 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, serves as the Fund’s administrator, transfer agent and fund accounting agent. Management and administrative services of Ultimus include (i) providing office space, equipment and officers and clerical personnel to the Fund, (ii) obtaining valuations, calculating net asset values and performing other accounting, tax and financial services, (iii) recordkeeping, (iv) regulatory, compliance and reporting services, (v) processing shareholder account transactions and disbursing dividends and distributions, and (vi) supervising custodial and other third party services.

The SAI has more detailed information about Hussman Strategic Advisors, Ultimus and other service providers to the Fund.
How the Fund Values Its Shares

The net asset value of the Fund’s shares (“NAV”) is calculated as of the close of regular trading on the New York Stock Exchange (generally 4:00 p.m., Eastern time) on each day that the Exchange is open for business. To calculate NAV, the Fund’s assets are valued and totaled, liabilities are subtracted, and the balance is divided by the number of shares outstanding. To the extent that the Fund’s foreign securities are traded in other markets on days when the Fund does not calculate its NAV, the value of the Fund’s assets may be affected on days when shares of the Fund cannot be purchased or sold. In addition, trading in some of the Fund’s foreign securities may not occur on days when the Fund is open for business. Because the values of foreign securities may be materially affected by events occurring before the Fund’s pricing time but after the close of the primary markets or exchanges on which such securities are traded, portfolio securities of the Fund that trade in foreign markets will typically be priced at their fair value as determined by an independent pricing service approved by the Board of Trustees. Valuing portfolio securities at fair value involves reliance on judgment and a security’s fair value may differ depending on the method used for determining value. As a result, the prices of securities used in calculating the Fund’s NAV may differ from quoted or published prices for the same securities. Values of foreign securities are translated from the local currency into U.S. dollars using currency exchange rates supplied by an independent pricing quotation service.

To the extent the Fund invests in shares of other open-end investment companies registered under the Investment Company Act of 1940, the Fund’s NAV with respect to those shares is calculated based upon the net asset values of such registered open-end investment companies, and the prospectuses for these companies explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

Your order to purchase or redeem Fund shares is priced at the next NAV calculated after your order is received in proper form by the Fund. Redemptions and exchanges of Fund shares may be subject to a redemption fee (see “How to Redeem Shares” for details).
The Fund is a no-load fund. This means that shares may be purchased without imposition of a sales charge. Shares of the Fund are available for purchase from the Fund every day the New York Stock Exchange is open for business, at the Fund’s NAV next calculated after receipt of a purchase order in proper form. The Fund reserves the right to reject any purchase request. Investors who purchase and redeem shares through a brokerage firm or other financial intermediary may be charged a fee by such brokerage firm or intermediary.

The Fund mails you confirmations of all purchases or redemptions of Fund shares. Certificates representing shares are not issued.

**MINIMUM INITIAL INVESTMENT**

The minimum initial investment in the Fund is $1,000, except for an IRA or a gift to minors account, for which the minimum initial investment is $500. These minimum investment requirements may be waived or reduced for certain other types of retirement accounts.

**OPENING AN ACCOUNT**

An account may be opened by mail or bank wire, as follows:

**By Mail.** To open a new account by mail:

- Complete and sign the account application.
- Enclose a check payable to Hussman Strategic International Fund.
- Mail the application and the check to the Fund’s transfer agent, Ultimus Fund Solutions, LLC (the “Transfer Agent”), at the following address:
  
  Hussman Strategic International Fund
  c/o Ultimus Fund Solutions, LLC
  P.O. Box 46707
  Cincinnati, Ohio 45246-0707

All purchases must be made in U.S. dollars and checks must be drawn on U.S. financial institutions. The Fund does not accept cash, drafts, “starter” checks, travelers checks, credit card checks, post-dated checks, cashier’s checks under $10,000, or money orders. In addition, to protect the Fund from check fraud, the Fund does not accept checks made payable to third parties. When shares are purchased by check, the proceeds from the redemption of those shares may not be paid until the purchase check has been converted to federal funds, which could take up to 15 calendar days. If an order to purchase shares is canceled because your check does not clear, you will be responsible for any resulting losses or other fees incurred by the Fund or the Transfer Agent in the transaction.
By sending your check to the Transfer Agent, please be aware that you are authorizing the Transfer Agent to make a one-time electronic debit from your account at the financial institution indicated on your check. Your bank account will be debited as early as the same day the Transfer Agent receives your payment in the amount of your check; no additional amount will be added to the total. The transaction will appear on your bank statement. Your original check will be destroyed once processed, and you will not receive your canceled check back. If the Transfer Agent cannot post the transaction electronically, you authorize the Transfer Agent to present an image copy of your check for payment.

By Wire. To open a new account by wire of federal funds, call the Transfer Agent at 1-800-HUSSMAN. A representative will assist you in obtaining an account application by telecopy or mail, which must be completed, signed and telecopied or mailed to the Transfer Agent before payment by wire may be made. Then, request your financial institution to wire immediately available funds to:

US Bank NA  
ABA # 042000013  
Attention: Hussman Strategic International Fund  
Credit Account # 821663168  
Account Name _________________  
For Account # _________________

An order is considered received when US Bank NA receives payment by wire. If your account application was telecopied to the Transfer Agent, you must also mail the completed account application to the Transfer Agent. See “Opening an Account – By Mail” above. Your financial institution may charge a fee for wiring funds. Shares will be issued at the NAV next computed after receipt of your wire.

Through Your Broker or Financial Institution. Shares of the Fund may be purchased through certain brokerage firms and financial institutions that are authorized to accept purchase orders on behalf of the Fund at the NAV next determined after your order is received by such organization in proper form. These organizations may charge you transaction fees on purchases of Fund shares and may impose other charges or restrictions or account options that differ from those applicable to shareholders who purchase shares directly through the Fund or the Transfer Agent. These organizations may be the shareholders of record of your shares. The Fund is not responsible for ensuring that the organizations carry out their obligations to their customers. Shareholders investing in this manner should look to the organization through which they invest for specific instructions on how to purchase and redeem shares.
SUBSEQUENT INVESTMENTS

Once an account is open, additional purchases of Fund shares may be made at any time in minimum amounts of $100, except for an IRA or gift to minors account, which must be in amounts of at least $50. Additional purchases may be made:

- By sending a check, made payable to Hussman Strategic International Fund, to Hussman Investment Trust, c/o Ultimus Fund Solutions, LLC, P.O. Box 46707, Cincinnati, Ohio 45246-0707. Be sure to note your account number on the memo line of your check. The shareholder will be responsible for any fees incurred or losses suffered by the Fund as a result of any check returned for insufficient funds.

- By wire of federal funds to the Fund account as described above under “Opening an Account – By Wire.” Shareholders should call the Transfer Agent at 1-800-HUSSMAN before wiring funds.

- Through your brokerage firm or other financial institution.

- By electronic funds transfer from a financial institution through the Automated Clearing House (“ACH”), as described below.

By Automated Clearing House (ACH). Once an account is open, shares may be purchased or redeemed through ACH in minimum amounts of $100. ACH is the electronic transfer of funds directly from an account you maintain with a financial institution to the Fund. In order to use the ACH service, the ACH Authorization section of the account application must be completed. For existing accounts, an ACH Authorization Form may be obtained by calling the Transfer Agent at 1-800-HUSSMAN. Allow at least two weeks for processing before using ACH. To place a purchase or redemption order by ACH, call the Transfer Agent at 1-800-HUSSMAN. There are no charges for ACH transactions imposed by the Fund or the Transfer Agent. ACH share purchase transactions are completed when payment is received, approximately two business days following the placement of your order. When shares are purchased through ACH, the proceeds from the redemption of those shares may not be paid until the ACH transfer has been converted to federal funds, which could take up to 15 calendar days. The shareholder will be held responsible for any fees incurred or losses suffered by the Fund as a result of any ACH transaction rejected for insufficient funds. Failure to notify the Fund in advance of an ACH transfer could result in a delay in completing your transaction.

ACH may be used to make direct investments into the Fund of part or all of recurring payments made to a shareholder by his or her employer (corporate, federal, military, or other) or by the Social Security Administration.
AUTOMATIC INVESTMENT PLAN

You may make automatic monthly investments in shares of the Fund from your bank, savings and loan or other depository institution account. The minimum subsequent investments must be $100 under the plan. The Transfer Agent currently pays the costs of this service, but reserves the right, upon 30 days’ written notice, to make reasonable charges. Your depository institution may impose its own charge for making transfers from your account.

PURCHASES IN KIND

The Fund may accept securities in lieu of cash in payment for the purchase of shares of the Fund. The acceptance of such securities is at the sole discretion of the Fund based upon the suitability of the securities as an investment for the Fund, the marketability of such securities, and other factors which the Fund may deem appropriate. If accepted, the securities will be valued using the same criteria and methods utilized to compute the Fund’s NAV.

CUSTOMER IDENTIFICATION AND VERIFICATION

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify and record information that identifies each person that opens a new account, and to determine whether such person’s name appears on government lists of known or suspected terrorists and terrorist organizations. As a result, the Fund must obtain the following information for each person that opens a new account:

- Name;
- Date of birth (for individuals);
- Residential or business street address (although post office boxes are still permitted for mailing); and
- Social security number, taxpayer identification number, or other identifying number.

You may also be asked for a copy of your driver’s license, passport, or other identifying document in order to verify your identity. In addition, it may be necessary to verify your identity by cross-referencing your identification information with a consumer report or other electronic database. Additional information may be required to open accounts for corporations and other entities. Federal law prohibits the Fund and other financial institutions from opening a new account unless they receive the minimum identifying information listed above.
After an account is opened, the Fund may restrict your ability to purchase additional shares until your identity is verified. The Fund also may close your account or take other appropriate action if it is unable to verify your identity within a reasonable time. If your account is closed for this reason, your shares will be redeemed at the NAV next calculated after the account is closed.

**FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES**

The Fund is designed to serve as a long-term investment vehicle and not as a frequent or short-term trading (“market-timing”) vehicle. Frequent short-term trading is not in the best interest of shareholders of the Fund. Such trading could result in higher expenses that result from increased portfolio trading and transaction costs; unplanned portfolio turnover; and asset swings that could decrease the Fund’s ability to maximize investment return. These risks can have an adverse affect on the Fund’s performance. It is believed that the frequently hedged investment stance of the Fund and the infrequency of “stale” prices reduces the likelihood of market timing in shares of the Fund, and also reduces the potential impact of such trading on shareholders. The Trust believes that the existing redemption fee generally offsets the expense of short-term trading to the Fund.

The Trust discourages frequent purchases and redemptions of shares of the Fund. With this goal in mind, the Board of Trustees has adopted policies and procedures that are intended to detect and prevent market timing in shares of the Fund. These policies and procedures are applied uniformly to all shareholders. The Trust, through its service providers, monitors shareholder trading activity to help ensure compliance with the Fund’s policies. The Trust prepares reports illustrating purchase and redemption activity to detect market timing activity. In addition, the Board of Trustees has adopted a 1.5% redemption fee that applies to redemptions or exchanges of shares of the Fund within 60 days of purchase. The Trust also reserves the right to reject any purchase order or exchange request that it believes to involve excessive trading of Fund shares or to be potentially disruptive in nature. The Trust may modify any terms or conditions applicable to the purchase of Fund shares or modify its policies as it deems necessary to deter market timing.

The Trust has entered into agreements with intermediaries obligating them to provide, upon request, information regarding their customers and their customers’ transactions in shares of the Fund. The Trust relies on intermediaries to help monitor and enforce its market timing policies. For example, intermediaries must determine when a redemption or exchange of shares occurs within 60 days of their purchase. The Trust reserves the right to reject any order placed from an omnibus account. Although the Trust has taken these steps to discourage frequent purchases and redemptions of shares, the Trust cannot guarantee that such trading will not occur.
How to Exchange Shares

Shares of the Fund and shares of Hussman Strategic Growth Fund, Hussman Strategic Total Return Fund and Hussman Strategic Dividend Value Fund may be exchanged for each other. Before making an exchange into another Hussman fund, you should obtain and read the prospectus for that fund. No transaction fees are charged for exchanges; however, your exchange may be subject to a redemption fee if the shares being exchanged have been purchased within the past 60 days (see “How to Redeem Shares”). You must meet the minimum investment requirements for the fund into which you are exchanging. The exchange of shares of one fund for shares of another fund is treated, for federal income tax purposes, as a sale on which you may realize a taxable gain or loss.

Shares of the Fund acquired by means of an exchange will be purchased at the NAV next determined after acceptance of the exchange request by the Transfer Agent. Exchanges that establish a new account may be made by sending a written request to the Transfer Agent. Exchanges into an existing account may be made by sending a written request to the Transfer Agent, or by calling 1-800-HUSSMAN. Please provide the following information:

• Your name and telephone number
• The exact name of your account and account number
• Taxpayer identification number (usually your Social Security number)
• Dollar value or number of shares to be exchanged
• The name of the fund from which the exchange is to be made
• The name of the fund into which the exchange is being made

The registration and taxpayer identification numbers of the two accounts involved in the exchange must be identical. To prevent the abuse of the exchange privilege to the disadvantage of other shareholders, the Fund reserves the right to terminate or modify the exchange privilege upon 60 days’ notice to shareholders.

The Transfer Agent requires personal identification before accepting any exchange request by telephone, and telephone exchange instructions may be recorded. If reasonable procedures are followed by the Transfer Agent to determine that the instructions are genuine, neither the Transfer Agent nor the Fund will be liable for losses due to unauthorized or fraudulent telephone instructions. In the event of drastic economic or market changes, a shareholder may experience difficulty in exchanging shares by telephone. If such a case should occur, sending exchange instructions by mail should be considered.
Shares of the Fund may be redeemed on any day on which the Fund computes its NAV. Shares are redeemed at their NAV next determined after the Transfer Agent receives your redemption request in proper form. Redemption requests may be made by mail or by telephone.

**By Mail.** You may redeem shares by mailing a written request to Hussman Investment Trust, c/o Ultimus Fund Solutions, LLC, P.O. Box 46707, Cincinnati, Ohio 45246-0707. Written requests must state the shareholder’s name, the name of the Fund, the account number and the number of shares or dollar amount to be redeemed and be signed exactly as the shares are registered.

**Signature Guarantees.** If the shares to be redeemed have a value of more than $50,000, or if the payment of the proceeds of a redemption of any amount is to be sent to a person other than the shareholder of record or to an address other than that on record with the Fund, you must have all signatures on written redemption requests guaranteed. If the name(s) or the address on your account has changed within the previous 15 days of your redemption request, the request must be made in writing with your signature guaranteed, regardless of the value of the shares being redeemed. The Transfer Agent will accept signatures guaranteed by a domestic bank or trust company, broker, dealer, clearing agency, savings association or other financial institution that participates in the STAMP Medallion Program sponsored by the Securities Transfer Association. Signature guarantees from financial institutions that do not participate in the STAMP Medallion Program will not be accepted. A notary public cannot provide a signature guarantee. The Transfer Agent has adopted standards for accepting signature guarantees from the above institutions. The Fund and the Transfer Agent reserve the right to amend these standards at any time without notice.

Redemption requests by corporate and fiduciary shareholders must be accompanied by appropriate documentation establishing the authority of the person seeking to act on behalf of the account. Forms of resolutions and other documentation to assist in compliance with the Transfer Agent’s procedures may be obtained by calling the Transfer Agent.

**By Telephone.** Unless the telephone redemption option was specifically declined on your account application, you may also redeem shares having a value of $50,000 or less by telephone by calling the Transfer Agent at 1-800-HUSSMAN. Telephone redemptions may be requested only if the proceeds are to be sent to the shareholder of record and mailed to the address on record with the Fund. Upon request, redemption proceeds of $100 or more may be transferred by ACH, and proceeds of $1,000 or more may be transferred by wire, in either case to the account registration stated on the account application. Shareholders may be charged a fee of $15 for outgoing wires.
Telephone redemption privileges and account designations may be changed by sending the Transfer Agent a written request with all signatures guaranteed as described above.

The Transfer Agent requires personal identification before accepting any redemption request by telephone, and telephone redemption instructions may be recorded. If reasonable procedures are followed by the Transfer Agent to determine that the instructions are genuine, neither the Transfer Agent nor the Fund will be liable for losses due to unauthorized or fraudulent telephone instructions. In the event of drastic economic or market changes, a shareholder may experience difficulty in redeeming shares by telephone. If such a case should occur, redemption by mail should be considered.

**Through Your Broker or Financial Institution.** You may also redeem your shares through a brokerage firm or financial institution that has been authorized to accept orders on behalf of the Fund at the NAV next determined after your order is received by such organization in proper form. NAV is normally determined as of 4:00 p.m., Eastern time on each day the New York Stock Exchange is open for business. Your brokerage firm or financial institution may require a redemption request to be received at an earlier time during the day in order for your redemption to be effective as of the day the order is received. These organizations may be authorized to designate other intermediaries to act in this capacity. Such an organization may charge you transaction fees on redemptions of Fund shares and may impose other charges or restrictions or account options that differ from those applicable to shareholders who redeem shares directly through the Transfer Agent.

**RECEIVING PAYMENT**

The Trust normally makes payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form. Under unusual circumstances, as permitted by the Investment Company Act of 1940 or by the Securities and Exchange Commission, the Fund may suspend the right of redemption or delay payment of redemption proceeds for more than seven days. Proceeds of a wire redemption request normally will be sent on the business day following the redemption. However, when shares are purchased by check or through ACH, the proceeds from the redemption of those shares may not be paid until the purchase check or ACH transfer has been converted to federal funds, which could take up to 15 calendar days.
REDEMPTION FEE

A redemption fee of 1.5% of the dollar value of the shares redeemed, payable to the Fund, is imposed on any redemption or exchange of shares within 60 days of the date of purchase. No redemption fee will be imposed on the redemption of shares representing reinvested dividends or capital gains distributions, or on amounts representing capital appreciation of shares. In determining whether a redemption fee is applicable to a particular redemption, it is assumed that the redemption is first of shares acquired pursuant to the reinvestment of dividends and capital gains distributions, and next of other shares held by the shareholder for the longest period of time.

The redemption fee is waived for required distributions from IRA accounts due to the shareholder reaching age 70½, and for any partial or complete redemption following death or disability (as defined in Section 22(e)(3) of the Internal Revenue Code) of a shareholder named on the account. The Fund may require documentation in connection with these waivers.

The redemption fee is also waived for shareholders systematically redeeming Fund shares under the automatic withdrawal plan (see “Automatic Withdrawal Plan” below). In order to qualify for this waiver, the total annual redemptions under the plan may not exceed 15% of the initial value of the Fund shares when the plan is established.

MINIMUM ACCOUNT BALANCE

Due to the high cost of maintaining shareholder accounts, the Fund may involuntarily redeem shares in an account, and pay the proceeds to the shareholder, if the shareholder’s account balance falls below $1,000 ($500 for IRA accounts or gifts to minors accounts) due to shareholder redemptions. This does not apply, however, if the balance falls below the minimum solely because of a decline in the Fund’s NAV. Before shares are redeemed to close an account, the shareholder is notified in writing and allowed 30 days to purchase additional shares to meet the minimum account balance requirement. Shares that are involuntarily redeemed pursuant to this provision will not be charged the redemption fee described above.

AUTOMATIC WITHDRAWAL PLAN

If the shares in your account have a value of at least $5,000, you (or another person you have designated) may receive monthly or quarterly payments in a specified amount of not less than $100 each. There is currently no charge for this service, but the Transfer Agent reserves the right, upon 30 days’ written notice, to make reasonable charges. Telephone the Transfer Agent toll-free at 1-800-HUSSMAN for additional information.
REDEMPTIONS IN KIND

The Fund reserves the right to make payment for a redemption in securities rather than cash, which is known as a “redemption in kind.” This would be done only under extraordinary circumstances and if the Fund deems it advisable for the benefit of all shareholders, such as a redemption of a significant percentage of the Fund’s shares that could adversely impact the Fund’s operations. A redemption in kind will consist of securities equal in market value to the Fund shares being redeemed. When you convert these securities to obtain cash, you will pay brokerage charges.

Dividends, Distributions and Taxes

Income dividends and net capital gain distributions, if any, are normally declared and paid annually in December. Your distributions of dividends and capital gains will be automatically reinvested in additional shares of the Fund unless you elect to receive them in cash. The Fund’s distributions of income and capital gains, whether received in cash or reinvested in additional shares, will be subject to federal income tax.

The Fund has qualified in all prior years and intends to continue to qualify as a regulated investment company for federal income tax purposes, and as such, it will not be subject to federal income tax on its taxable income and gains that it distributes to its shareholders. The Fund intends to distribute its income and gains in such a way that it will not be subject to a federal excise tax on certain undistributed amounts.

Distributions attributable to ordinary income and short-term capital gains are generally taxed as ordinary income, although certain income dividends may be taxed to non-corporate shareholders at long-term capital gains rates. In the case of corporations that hold shares of the Fund, certain income from the Fund may qualify for a 70% dividends-received deduction. Distributions of long-term capital gains are generally taxed as long-term capital gains, regardless of how long you have held your Fund shares.
Distributions resulting from the sale of foreign currencies and foreign obligations, to the extent of foreign exchange gains, are generally taxed as ordinary income or loss. If the Fund pays non-refundable taxes to foreign governments during the year, these taxes will reduce the Fund’s net investment income but still may be included in your taxable income. However, you may be able to claim an offsetting tax credit or itemized deduction on your return for your portion of foreign taxes paid by the Fund.

The Fund’s transactions in options, futures contracts and ETFs are subject to special tax rules. These rules and rules applicable to wash sales, straddle transactions and certain other types of transactions can affect the amount, timing and characteristics of distributions to shareholders.

When you redeem or exchange Fund shares, you generally realize a capital gain or loss as long as you hold the shares as capital assets. Except for investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or IRA accounts, tax-exempt investors that do not borrow to purchase Fund shares and non-U.S. investors, any gain realized on a redemption or exchange of Fund shares will be subject to federal income tax.

You will be notified by February 15 of each year about the federal tax status of distributions made by the Fund during the prior year. Depending on your residence for tax purposes, distributions also may be subject to state and local taxes.

Federal law requires the Fund to withhold taxes on distributions paid to shareholders who fail to provide a social security number or taxpayer identification number or fail to certify that such number is correct. Foreign shareholders may be subject to special withholding requirements.

Because everyone’s tax situation is not the same, you should consult your tax professional about federal, state and local tax consequences of an investment in the Fund.
Financial Highlights

The financial highlights table is intended to help you understand the Fund’s financial performance for the period of the Fund’s operations. Certain financial information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Ernst & Young LLP, whose report, along with the Fund’s financial statements, is included in the annual report, which is available upon request.

</tbody>
</table>

(a) Represents the period from the commencement of operations (December 31, 2009) through June 30, 2010.
(b) Amount rounds to less than $0.01 per share.
(c) Total return is a measure of the change in value of an investment in the Fund over the period covered, which assumes any dividends or capital gains distributions are reinvested in shares of the Fund. Returns do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares.
(d) Not annualized.
(e) Absent investment advisory fee reductions and expense reimbursements by the Adviser, the ratios of expenses to average net assets would have been 2.14% and 5.00%(f) for the periods ended June 30, 2011 and 2010, respectively.
(f) Annualized.
# PRIVACY NOTICE

**FACTS**

**WHAT DO THE HUSSMAN FUNDS DO WITH YOUR PERSONAL INFORMATION?**

**Why?**

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

**What?**

The types of personal information we collect and share depend on the product or service you have with us. This information can include:

- Social Security number
- Assets
- Retirement Assets
- Transaction History
- Checking Account Information
- Purchase History
- Account Balances
- Account Transactions
- Wire Transfer Instructions

When you are *no longer* our customer, we continue to share your information as described in this notice.

**How?**

All financial companies need to share your personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers’ personal information; the reasons the Hussman Funds choose to share; and whether you can limit this sharing.

<table>

### Who we are

| Who is providing this notice? | Hussman Investment Trust  
Ultimus Fund Distributors, LLC (Distributor)  
Ultimus Fund Solutions, LLC (Administrator) |

### What we do

| How do the Hussman Funds protect my personal information? | To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings.  
Our service providers are held accountable for adhering to strict policies and procedures to prevent any misuse of your nonpublic personal information. |

| How do the Hussman Funds collect my personal information? | We collect your personal information, for example, when you  
- Provide account information  
- Give us your contact information  
- Make deposits or withdrawals from your account  
- Make a wire transfer  
- Tell us where to send the money  
- Tell us who receives the money  
- Show your government-issued ID  
- Show your driver’s license  
We also collect your personal information from other companies. |

| Why can’t I limit all sharing? | Federal law gives you the right to limit only  
- Sharing for affiliates’ everyday business purposes – information about your creditworthiness  
- Affiliates from using your information to market to you  
- Sharing for nonaffiliates to market to you  
State laws and individual companies may give you additional rights to limit sharing. |

### Definitions

| Affiliates | Companies related by common ownership or control. They can be financial and nonfinancial companies.  
- Hussman Strategic Advisors, Inc., the investment manager to the Hussman Funds, could be deemed to be an affiliate. |

| Nonaffiliates | Companies not related by common ownership or control. They can be financial and nonfinancial companies  
- The Hussman Funds do not share with nonaffiliates so they can market to you. |

| Joint marketing | A formal agreement between nonaffiliated financial companies that together market financial products or services to you.  
- The Hussman Funds do not jointly market. |
John P. Hussman, Ph.D. is the president of Hussman Strategic Advisors, Inc. and the lead portfolio manager of Hussman Strategic International Fund. Previously, Dr. Hussman was a professor at the University of Michigan, where he taught courses in Financial Markets, Banking, and International Finance. He holds a Ph.D. in Economics from Stanford University. He also holds a B.A. in Economics, Phi Beta Kappa, and an M.S. in Education and Social Policy from Northwestern University.

William J. Hester, CFA is a Senior Research Analyst at Hussman Strategic Advisors, Inc. and the co-portfolio manager of Hussman Strategic International Fund. Prior to joining Hussman Strategic Advisors in 2003, Mr. Hester worked for Bloomberg L.P. where he was a member of the company’s Analytics Desk and a Markets Editor for Bloomberg Magazine. Mr. Hester has over 20 years of experience in financial analysis and investment research. He holds a B.S. in Economics from Rider University and a M.S. in Finance from the Johns Hopkins Carey Business School, and is a Chartered Financial Analyst.
In addition to the information contained in the Prospectus, the following documents are available free upon request:

- **Annual and Semi-Annual Reports**
  The Fund publishes annual and semi-annual reports to shareholders that contain detailed information on the Fund’s investments. The annual report contains a discussion of the market conditions and investment strategies that significantly affected the Fund’s performance during its last fiscal year.

- **Statement of Additional Information ("SAI")**
  The SAI provides additional information about the Fund. It is incorporated by reference and is legally considered a part of this Prospectus. A description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio securities is available in the SAI.

The Fund makes available the SAI and annual and semi-annual reports, free of charge, on the Fund’s website (www.hussmanfunds.com). You may also request copies of these materials and other information, without charge, or make inquiries to the Fund by writing to Ultimus Fund Solutions at the address on the previous page. You may also call toll-free: 1-800-HUSSMAN (1-800-487-7626)

Only one copy of a Prospectus or an annual or semi-annual report will be sent to each household address. This process, known as “Householding,” is used for most required shareholder mailings. (It does not apply to confirmations of transactions and account statements, however.) You may, of course, request an additional copy of a Prospectus or an annual or semiannual report at any time by calling or writing the Fund. You may also request that Householding be eliminated from all your required mailings.

Information about the Fund (including the SAI) can be reviewed and copied at the Securities and Exchange Commission’s Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room can be obtained by calling the Commission at 1-202-551-8090. Reports and other information about the Fund are available on the EDGAR Database on the Commission’s Internet site at http://www.sec.gov. Copies of information on the Commission’s Internet site may be obtained, upon payment of a duplicating fee, by writing to the Securities and Exchange Commission, Public Reference Section, Washington, D.C. 20549-1520, or by sending your request electronically to the following e-mail address: publicinfo@sec.gov.
